Andrey Pavlushov

Low Voltage Engineer | Electronic Security System Engineer | Expert in Surveillance, Access Control & Intrusion Detection

Moscow, Moscow City, Russia

Summary

I am an Electronic Security Systems Engineer with a strong foundation in the implementation, management and repair of advanced security solutions. My knowledge covers the full range of low-voltage systems from modern surveillance and access control systems to smart meter integration.

Key strengths:

- Deep knowledge of Extra-low voltage (ELV), including design and deployment of surveillance, access control solutions and IoT
- Broad knowledge of IT from hardware infrastructure to modern software solutions and languages, I know networks at CCNA level; can change binary code, compile source or create a script; as well as familiar with databases and the web.
- Commitment to continuous learning and adaptation to new technologies in the ever-changing IT landscape.

Experience

TELEMATIKA

Security Manager

June 2023 - February 2024 (9 months)

Moscow City, Russia

Manage security systems, review solutions and procedures, work with contractors

Mirtek

Engineer researcher

January 2018 - July 2019 (1 year 7 months)

Stavropol, Russia

Testing new equipment, field service in Russia and the CIS, support

SBV-Video

Service Engineer

September 2012 - September 2016 (4 years 1 month)

Stavropol, Russia

Software/Hardware testing and integration, Field support, Repair of security systems: soldering of elements, firmware of chips, claim and reclamation work

Tehno Dom

Adjuster security system

2005 - 2010 (5 years)

Stavropol, Russia

Installation of security systems: video surveillance, alarm systems, access control; LAN, telemetry

Education

Sholokhov Moscow State University

Master's degree, informatics-economist · (September 2005 - June 2010)

Stavropol construction technical school

technician builder · (2001 - 2005)
